Elite Casino Products Unveils New Millennium Slot Cabinets,
Widescreen, Spinning Reel and Slant Top, at Global Gaming Expo

ITASCA, IL, 10/1/08: Elite Casino Products will unveil several new and exciting slot products at the Global Gaming Expo taking place in Las Vegas in November. The Company plans to launch three new cabinet styles as well as introduce new top boxes and toppers on November 18, 2008.

Expanding the Company's existing cabinet product line, Elite Casino Products (ECP) will introduce its new Millennium Widescreen, Millennium Spinning Reel, and Millennium Velocity cabinets. These cabinets are attractively styled, yet ruggedly constructed to withstand a busy casino environment. The new Millennium Series styles offer a variety of features and finishing options that enhance player comfort, provide outstanding visual appeal, and improve technical serviceability. A brief overview of ECP's new cabinets are detailed below:

Millennium Widescreen – Designed with a striking 22" widescreen LCD and the clean, classic lines of a traditional cabinet, the Millennium Widescreen Cabinet is sure to make an impression. The LCD offers crisp clarity with an 89° viewing angle from all four directions (16:9 viewing aspect ratio). Additionally, the Widescreen is designed with ultimate flexibility and can be converted to accommodate spinning reels based on customer requirements.

Millennium Spinning Reel – Flexibility best describes this slot cabinet. The Millennium Spinning Reel is available in 3, 4, or 5 reel configurations; however, the cabinet features interchangeable reel trays to quickly and easily change the reel configuration. Additional flexibility allows customization of spacing between reels, reel manufacturer, and lighting options such as VFD display or 7 Segment LED boards.

Millennium Velocity – An outstanding video display and player comfort are the driving forces behind ECP's new slant top cabinet. This platform features a giant 26" widescreen LCD that offers outstanding graphic clarity and player appeal. The Velocity has several features that enhance player comfort, including a large player interface dashboard, generous seating area and sculpted armrest.

The fashionable exterior of each Millennium Series cabinet attracts players' attention, yet is durable to perform well in the harshest environments. Each cabinet is equipped with a universal internal mounting system which allows for easy installation of existing electronics. The cabinet doors are designed with interchangeable components to increase flexibility and provide a unique look which distinguishes ECP's clients' slot cabinets on an active casino floor.

To further develop the company's slot product portfolio, Elite Casino Products offers 12 new top box designs, as well as new topper and base products. The Company will proudly unveil all these new products, as well as its new slot machine cabinets – the Millennium Widescreen, Spinning Reel, and Velocity – at the upcoming Global Gaming Expo. ECP's slot products are the perfect compliment to any slot game. Visit our company at the Global Gaming Expo at Booth 3474. You can also find us online at www.ecp-usa.com.

About the company:

Elite Casino Products is a manufacturer of high quality electro-mechanical assemblies specializing in gaming applications. The company's standard product line includes slot machine cabinets, bases, marquees, kiosks, and video monitor housings. Customized production options are limitless with Elite Casino Products' experienced mechanical and electrical engineers and talented production staff. All of ECP's products are designed with superior quality and durability in mind.
