Elite Casino Products' new Nitro-XL cabinet features a 32" touchscreen LCD, giving you complete graphic control to combine exciting game play and exhilarating bonus rounds onto one LCD touchscreen. Submerge players in the ultimate gaming experience with NITRO's energizing sound system and vibrant edge-lighting that can be programmed to coordinate with game themes. Customize cabinet features to your own specifications and get your players' pulses racing with the new Nitro-XL Cabinet.

Research & Design

ECP performs detailed **focus group studies** on all new product releases to ensure that cabinet styling is among the highest rated.

Additionally, ECP takes an indepth look into the **ergonomic design of our products** by studying size and proportion variations of the human body in order to ensure player comfort and maximize time on device.

With the knowledge and information gained directly from the slot players, combined with our expertise in design engineering, ECP develops the products that please players and game manufacturers alike! Ask your ECP representative for more information about our indepth product studies.
